

Elsevier publishing and research data quality workshop

Agenda

13:00 – 13:15 Opening by a host institution representative and/or Elsevier

13:15 -15:00 **Author workshops: how to get published and gain recognition?**

Katarzyna Gaca-Zajac, PhD Eng.,
Customer Consultant for Central-Eastern Europe, Elsevier

This session will discuss the principles and best practices of academic publishing at every stage: from manuscript preparation, through its submission and publication, until post-publication practices which boost visibility. Participants will also learn about best practices in writing manuscripts, choosing the right journal, as well as about ethics in publishing and the role and importance of Open Access and Open Science. This session constitutes a summary of best practices in communicating research and it is based on experience of researchers, editors and readers.

15:00 – 15:30 Coffee break/lunch 

15:30– 16:30 **Scopus data – collection, storage and use**

Katarzyna Kryszczuk,
Customer Consultant for Central-Eastern Europe, Elsevier

There are many legends and common concerns about Scopus data. This presentation will show how does the process of providing data by Scopus looks like. It will explain how Elsevier ensures data quality and the process of data curation and maintenance. It will focus also on some examples of using Scopus data. Participants will see some analysis of research output in Slovakia based on Scopus data.

16:30 – 16:45 Closing speech by Elsevier representative, Q&A session
